

* In cc5A:

- 1) Corrected the location of bash shell
- 2) Format of first line also added
- 3) Added a line for compiling with SDK8.2
- 4) Compile time warning of IOHack.c corrected

* Parse5A.c:

- 1) Fixed scan_set bug (thanks to Mark Kettenis)
- 2) Added a new method for getting the DTS_id. It is no longer based on the date code of specific files, by a #define value.

* Parse5A.h:

- 1) A new #define was added for the DTS_id to remove dependency on file date codes

* Mark5A.c:

- 1) Fixed a memory leak on opening / closing connections to the Mark5A application.
 - a) 4 Bytes with each open/close sequence.
